

COVID-19 Data by Municipality Summary

February 9, 2021

Summary

- According to local data, currently in Fond du Lac County the burden of confirmed COVID-19 cases is high. The past 2-week confirmed case rate for Fond du lac County is 248.9 per 100,000 population, a decrease from the 297.3 per 100,000 population case rate reported last week.
- Unusually high case rates, in part, due to small population sizes, were noted in the past two weeks for many municipalities.
- There has been an increase in antigen testing, contributing to an increase in probable COVID-19 cases, as compared to confirmed cases. Positive antigen test results are considered a probable case. For more on probable cases please see [WI DHS COVID-19: County Data](#).
- Although the case rate is decreasing in the county and vaccine rollout has begun, case rates remain high. It will take at least until the end of the summer to reach an adequate level of community immunity. It is important to remain vigilant in taking actions to stop the spread such as wearing a mask, social distancing, avoiding crowded indoor spaces, and practicing good hand hygiene. With a more contagious variant (a new strain of the SARS-CoV-2 virus) circulating in Wisconsin, we have to be careful to avoid another surge in virus activity.
- WI DHS has map visualizations available for data on COVID-19 cases and deaths by county and census tract, municipality, school district, and zip code. Access [WI DHS COVID-19 map visualization data here](#).

Background Information and Considerations

This report provides data on the confirmed COVID-19 cases from January 25, 2021 – February 7, 2021 for municipalities located within the Fond du Lac County Health Department jurisdiction. Data may be underreported for recent days because test results can take multiple days to be reported to the health department. Data are subject to change as cases are investigated, for example as updates or corrections are made to case information. As this is a weekly report for the past 14 days, there will always be a week of overlap between reports.

The COVID-19 data provided in this report is specific to the Fond du Lac County Health Department (FCHD) jurisdiction (population: 105,269). It does not include data or cases for the portions of municipalities that fall outside of Fond du Lac County, such as the City of Waupun. FCHD only provides case counts, case rates, and burden status based on the jurisdiction of Fond du Lac County. Case rates fluctuate greatly among municipalities with small population sizes. Interpret case rates with caution.

Confirmed Cases by Municipality for the Past Two Weeks (Jan. 25 – Feb. 7, 2021)

Municipality	Confirmed Case Count for past 2 weeks	Case Rate (per 100,000)	Burden*	Population**
City of Fond du Lac	114	259.4	High The populations in these municipalities are too small to provide burden status. Case rates fluctuate greatly with small population sizes. Interpret with caution, rely more on case counts and trend of case counts over time to estimate risks. Data is suppressed for municipalities with fewer than five confirmed cases in the past two weeks.	43,954
City of Ripon	11	136.8		8,042
Village of North Fond du Lac	24	470.0		5,106
Town of Taycheedah	13	295.5		4,400
Town of Fond du Lac	8	221.0		3,620

Fond du Lac County	262	248.9	High	105,269

*Burden is based off of the case rate per 100,000 people in the past two weeks. See table on page 3 for more information on Burden Status. Visit the DHS website for more information on this indicator at the state level

<https://www.dhs.wisconsin.gov/covid-19/local.htm>

Note: The data for Fond du Lac County in this report is based on a different reporting period as compared to WI DHS COVID-19: Activity Level by Region and County, due to this the count and burden will not align with WI DHS data.

**Population for municipality was retrieved from July 1, 2020 ESRI Census Block Apportionment Data Enrichment.

***Fond du Lac County does not report for portions of the City of Waupun that fall outside of Fond du Lac County.

Burden Status	Case Rate per 100,000 residents in the past two weeks
Low	Case rate is less than or equal to 10.
Moderate	Case rate is greater than 10, but less than or equal to 50.
Moderately High	Case rate is greater than 50, but less than or equal to 100.
High	Case rate is greater than 100.
Very High	Case rate is greater than 350.
Critically High	Case rate is greater than 1,000.

Note: Case rate is determined by number of new confirmed cases during the past two weeks, divided by population in the municipality, multiplied by 100,000. Rates can fluctuate greatly with small population sizes making it difficult to call out high rates. The number of cases for each burden status refers to the number of confirmed cases during a two-week time span.
